

THE GOLD-FIELDS OF NEW SOUTH WALES.

[FROM OUR SPECIAL COMMISSIONER.]

THE GOLD-FIELDS OF NEW SOUTH WALES.
[FROM OUR SPECIAL COMMISSIONER.]

No. 21.
SOFALA TO BATHURST.

LEAVING Sofala by the N.E. road to Bathurst, the heavy, thin, muddy ranges that bound the Turon river at this side, striking the Oakey Bend about three miles from the river. Up this it proceeds winding amongst the holes and heaps of refuse stuff across the brow of the ridge, and then through the Watlie Flat and Solitary Creek, its line bordered by numerous large rough, bare hills, having small patches of garden ground attached to them, and sometimes even paddocks fenced in around them. Digging was being carried on with great spirit, the whole of the day being paid for by the day, and that, giving good wages to all employed. After passing the last of the shafts, the track leads through thick scrub along the crest of heavy stony ranges, and then skirts their sides in a gradual descent, until it comes upon the Wyaggen Hill, down which it goes with a heavy fall, over a road completely whitened with abraded quartz, into a beautiful valley, that extends for about a mile across a fine alluvial flat, from the deep hills that border it on either side. For about a mile-and-a-half the road traverses the valley, until it reaches an inn kept by one James Shaw.

It had been nearly one o'clock before I left Sofala, and my horse being very weary from the long journey, travelled but slowly, and the result was, that before I made the inn, I had my misgivings on the discipline of the road, and the only place in which a horse could sit down was a small, low, and a bad position. Without at all anticipating the scenes that followed, I had a dislike at being forced to be a witness of wild scenes of revelry, particularly on a Sunday night. I found the next day was the opening of the Bathurst Quarter, and consequently the house was full of persons travelling thither, either as witnesses, prosecutors, defendants, or jurors. I passed over all the inconveniences I experienced, and found the house to be a very good one, and waited till all had finished supper, before I could begin seeing that I had no particular fancy for supping with men the half of whom were roaring drunk by that time, and the only room for sitting in, driving me out to a promenade on the terrace, to the great annoyance of the house. I passed over this; but the frightful orgies that followed I cannot but mention. I hope, too, that this letter may attract the notice of some of the magistracy of the district, and that they will be able to put a stop to the nuisance. Mr. Shaw's mode of conducting his house may be made by them. Some three or four of the persons present were very much the worse for liquor, and shortly after midnight, a party began to be conducted at a great rate; the music of the fiddle, and the sound of the drum, were heard, and the guests, first of all, by getting them to "have a step," that is, to dance; and at last when all seemed dull, they challenged one of them, a tall Irishman, who was exceedingly drunk, and had been very noisy, but was gradually subsiding into sleepy quietude when this challenge was given. He was very unwilling for the trial, but he was ultimately forced into it by the landlord and the others. This skirmish went. This work continued for some time, until by dint of ill-usage, not only from the landlord but from those around, the Irishman got enraged, and in a sudden fit of passion, he seized the fiddle, and in a manner that would have made the matter still more serious had the blow taken effect. Some of those present, however, immediately interfered. The man was thrown down, and a disinterested, after some fearful oaths and blasphemy on all sides. This skirmish got some of the most drunken of the scene, and with very little hope of getting to sleep, I myself went to bed. Some enough these orgies were continued until after midnight, when the guests, who were all dancing and fighting, some of the guests suddenly being of any but a decent character. I need hardly tell you that I spent a miserable night, or that it was with the greatest difficulty that I could get to sleep, and that I was not able to get to bed until the following day.

Across some short stony ranges down to a fine cultivated plain, which formed a regular little town, I travelled, the mist of early morning gradually thickening into a regular fog, which struck me as I went the way to Bathurst, being so heavy on the Plains that nothing beyond five or six yards distant was perceptible. Through this my horse, who had not apparently feared much my eyes, on the preceding night, stumbled heavily and heavily, and the poor animal making a most determined attempt to get towards every stable I passed, and on to the Royal.

Bathurst is, without exception, the finest of our inland towns. It is built on the banks of the Macquarie River, almost in the centre of an extensive plain, and at the foot of a series of gentle undulating downs, or hills, which form an extension of the town has been carried. Its streets are broad, and laid out in straight lines, from East to West, and from North to South, intersecting each other at right angles, and the houses, which are all at an equal level, and many of them, shops and public buildings, would not disgrace a leading thoroughfare of the metropolis. In the centre of the town is a large square, or rather a vacant spot of ground, for I find it is a reserve, and the only one of the kind in the colony, which is formed by the gait, in front of which stands the Court House, both of which are built upon the ordinary New South Wales model, and which, as far as the eye is concerned, appears to be a very unimpressive sight. The one plan, and the one specification had sufficed for all the courts, and all the gaols in the colony; there being so little variation, except only in the materials used, and the dimensions of the gaols, that the traveller who has seen these buildings at any one place, would never be at a loss as to their use when he saw the counterparts of these edifices elsewhere. The Court-house is, however, a sufficiently imposing building, and the gaol, with the adjacent gaol placed in the most prominent position in the town, certainly detracts very much from the prestige of the place; reminding one, as it does, of days that all who have passed through them would willingly have seen the one part of the building reserved, the Episcopal church is situated; it is an unpretending edifice, though not without architectural grace; at all events it is characteristic of the purpose it has to serve, and the only one of the kind in the colony. The Presbyterian church, which is a new edifice, is also very much to be recommended by the naked red brick of which it is constructed. The attention of the eye is attracted to a plain edifice, but noble looking from its very simplicity. The Catholic church stands at the rear of the gaol, and is a rambling kind of edifice, that appeared to me most likely to be the work of some one who had occupied with the numerous buildings—almost too low for good effect. A fine piece of land, however, at the other end of the church reserve, and facing into another street, was being dug out for the foundations of a new church, which, when completed, would be a credit to the place, and a great improvement to the town. The Wesleyan chapel is also close by, and is as usual a very plain edifice, too small at present for its numerous congregation. The church, however, is a fine specimen of the kind, and the foundations of a new building, the first stone of which was to be laid a few days after my departure. The gaol is an exceedingly strong and well constructed building, the excellent management of its governor, Mr. Chippenale, having rendered it one of the most complete establishments of the kind that I have seen in the colony. In addition to the main building, in which the prisoners are confined, there has been lately constructed a new building, the prison house, a row of very neat brick buildings, within the walls, as residence for himself and also for the turkeys employed. The vacant ground in front of the main building is a fine piece of land, and is a credit to the place, and a great improvement to the town.

The vacant ground in front of the main building is a fine piece of land, and is a credit to the place, and a great improvement to the town.

great complaints are made, as the duty of escorting prisoners falls very heavily upon the men.

The number of public-houses, as compared with the population, is much greater in Bathurst than in any other of the colonies, there having been no less than 62 general license houses last year by the Bathurst Bench, for the towns of Bathurst and Kato; the number for the district being 15. The reason alleged for the great number of license houses is the fact that the district is a large one, and an influx of persons, that accommodation to the extent named is absolutely required. It is reckoned that during the sitting of this Court, an addition of at least ten thousand persons will be present, and the population of Bathurst. The Small Debt Court, at its six weekly sittings, the cases numbering from 30 to 40 each sitting. Such of the unpaid magistrates as reside out of town attend to their duties only when summoned to attend, and on one of the sittings of the Petty Sessions; for the ordinary conduct of business, reliance is only to be placed on the presence of those resident in town.

There are three schools established under the Denominational Board, but as yet no National school has been formed here. A handsome schoolhouse is being erected in the immediate vicinity of the Episcopal church, to which it is attached. Besides these, there are also several very excellent private scholastic establishments.

The hospital is a low one-story building to the east of the town, forming with its narrow verandah a true type of the old colonial style of architecture, being all blank wall, pierced with holes for doors and windows. It has been for some years handed over by the Government to the management of the inhabitants themselves, and is supported very liberally, as I was given to understand, by voluntary subscription of course with a grant in aid from the Government. It is cleanly, evidently under good management. It affords relief, ordinarily, to an average of about 25 patients, though as many as 40 could be accommodated on a pinch. I noticed several Chinese patients there on the occasion of my visit.

The population of Bathurst has not perceptibly increased by immigration, the consequence of the natural way, by birth, but something very great. Bathurst, like all the western country, being great in children and pigs. Buildings were being run up in every direction, particularly on the eastern side of the town, where numerous town lots have recently been sold. The value of business premises here may be guessed from the fact that only a short time prior to my visit, a house with good buildings on a good position for trade, being situated at one corner, the north-west, of the square or reserve I have mentioned, and on one of the hotel and theatre. House rent generally ranges high for business premises, in commanding localities, though not so heavy proportionately as in Sydney.

In addition to the bridge over the Macquarie River, several other bridges have been erected in some of the bye streets of the town, where the heavy wash of the torrents of water that pour down in the wet season has worn deep and dangerous gullies that rendered the passage of the vehicles and the carrying of the chaff, there are very several dangerous spots requiring similar convenience.

Kello, on the eastern bank of the Macquarie, is an exceedingly fine and pretty town, and is a beautiful residence surrounding it. It stands at the foot of a bald range, its neat white-fronted houses, church spire, and verdant gardens forming a delightful picture upon the wide extended plain.

ELECTORAL REFORM.
To the Editor of the Sydney Morning Herald.
Sir.—The "representation of minorities," recently introduced into the Bill of the House of Representatives, would produce by becoming part of our electoral law, there is much ignorance or erroneous notions very prevalent, which to assist in removing I beg to offer a few brief remarks.

It is said, "Such a change in the law could not take place—it would be governing by a minority." Now, little education ought to satisfy and demonstrate as clear as two and two make four the error of this assertion. For instance, in Sydney, and the districts, in turning two members, bare majorities would have half the representatives; in any district returning three members, they should have two to one; every district returning one member would have one elector; every district returning two members would have two electors; every district returning three members would have three electors; every district returning four members would have four electors; every district returning five members would have five electors; every district returning six members would have six electors; every district returning seven members would have seven electors; every district returning eight members would have eight electors; every district returning nine members would have nine electors; every district returning ten members would have ten electors; every district returning eleven members would have eleven electors; every district returning twelve members would have twelve electors; every district returning thirteen members would have thirteen electors; every district returning fourteen members would have fourteen electors; every district returning fifteen members would have fifteen electors; every district returning sixteen members would have sixteen electors; every district returning seventeen members would have seventeen electors; every district returning eighteen members would have eighteen electors; every district returning nineteen members would have nineteen electors; every district returning twenty members would have twenty electors; every district returning twenty-one members would have twenty-one electors; every district returning twenty-two members would have twenty-two electors; every district returning twenty-three members would have twenty-three electors; every district returning twenty-four members would have twenty-four electors; every district returning twenty-five members would have twenty-five electors; every district returning twenty-six members would have twenty-six electors; every district returning twenty-seven members would have twenty-seven electors; every district returning twenty-eight members would have twenty-eight electors; every district returning twenty-nine members would have twenty-nine electors; every district returning thirty members would have thirty electors; every district returning thirty-one members would have thirty-one electors; every district returning thirty-two members would have thirty-two electors; every district returning thirty-three members would have thirty-three electors; every district returning thirty-four members would have thirty-four electors; every district returning thirty-five members would have thirty-five electors; every district returning thirty-six members would have thirty-six electors; every district returning thirty-seven members would have thirty-seven electors; every district returning thirty-eight members would have thirty-eight electors; every district returning thirty-nine members would have thirty-nine electors; every district returning forty members would have forty electors; every district returning forty-one members would have forty-one electors; every district returning forty-two members would have forty-two electors; every district returning forty-three members would have forty-three electors; every district returning forty-four members would have forty-four electors; every district returning forty-five members would have forty-five electors; every district returning forty-six members would have forty-six electors; every district returning forty-seven members would have forty-seven electors; every district returning forty-eight members would have forty-eight electors; every district returning forty-nine members would have forty-nine electors; every district returning fifty members would have fifty electors; every district returning fifty-one members would have fifty-one electors; every district returning fifty-two members would have fifty-two electors; every district returning fifty-three members would have fifty-three electors; every district returning fifty-four members would have fifty-four electors; every district returning fifty-five members would have fifty-five electors; every district returning fifty-six members would have fifty-six electors; every district returning fifty-seven members would have fifty-seven electors; every district returning fifty-eight members would have fifty-eight electors; every district returning fifty-nine members would have fifty-nine electors; every district returning sixty members would have sixty electors; every district returning sixty-one members would have sixty-one electors; every district returning sixty-two members would have sixty-two electors; every district returning sixty-three members would have sixty-three electors; every district returning sixty-four members would have sixty-four electors; every district returning sixty-five members would have sixty-five electors; every district returning sixty-six members would have sixty-six electors; every district returning sixty-seven members would have sixty-seven electors; every district returning sixty-eight members would have sixty-eight electors; every district returning sixty-nine members would have sixty-nine electors; every district returning seventy members would have seventy electors; every district returning seventy-one members would have seventy-one electors; every district returning seventy-two members would have seventy-two electors; every district returning seventy-three members would have seventy-three electors; every district returning seventy-four members would have seventy-four electors; every district returning seventy-five members would have seventy-five electors; every district returning seventy-six members would have seventy-six electors; every district returning seventy-seven members would have seventy-seven electors; every district returning seventy-eight members would have seventy-eight electors; every district returning seventy-nine members would have seventy-nine electors; every district returning eighty members would have eighty electors; every district returning eighty-one members would have eighty-one electors; every district returning eighty-two members would have eighty-two electors; every district returning eighty-three members would have eighty-three electors; every district returning eighty-four members would have eighty-four electors; every district returning eighty-five members would have eighty-five electors; every district returning eighty-six members would have eighty-six electors; every district returning eighty-seven members would have eighty-seven electors; every district returning eighty-eight members would have eighty-eight electors; every district returning eighty-nine members would have eighty-nine electors; every district returning ninety members would have ninety electors; every district returning ninety-one members would have ninety-one electors; every district returning ninety-two members would have ninety-two electors; every district returning ninety-three members would have ninety-three electors; every district returning ninety-four members would have ninety-four electors; every district returning ninety-five members would have ninety-five electors; every district returning ninety-six members would have ninety-six electors; every district returning ninety-seven members would have ninety-seven electors; every district returning ninety-eight members would have ninety-eight electors; every district returning ninety-nine members would have ninety-nine electors; every district returning one hundred members would have one hundred electors; every district returning one hundred and one members would have one hundred and one electors; every district returning one hundred and two members would have one hundred and two electors; every district returning one hundred and three members would have one hundred and three electors; every district returning one hundred and four members would have one hundred and four electors; every district returning one hundred and five members would have one hundred and five electors; every district returning one hundred and six members would have one hundred and six electors; every district returning one hundred and seven members would have one hundred and seven electors; every district returning one hundred and eight members would have one hundred and eight electors; every district returning one hundred and nine members would have one hundred and nine electors; every district returning one hundred and ten members would have one hundred and ten electors; every district returning one hundred and eleven members would have one hundred and eleven electors; every district returning one hundred and twelve members would have one hundred and twelve electors; every district returning one hundred and thirteen members would have one hundred and thirteen electors; every district returning one hundred and fourteen members would have one hundred and fourteen electors; every district returning one hundred and fifteen members would have one hundred and fifteen electors; every district returning one hundred and sixteen members would have one hundred and sixteen electors; every district returning one hundred and seventeen members would have one hundred and seventeen electors; every district returning one hundred and eighteen members would have one hundred and eighteen electors; every district returning one hundred and nineteen members would have one hundred and nineteen electors; every district returning one hundred and twenty members would have one hundred and twenty electors; every district returning one hundred and twenty-one members would have one hundred and twenty-one electors; every district returning one hundred and twenty-two members would have one hundred and twenty-two electors; every district returning one hundred and twenty-three members would have one hundred and twenty-three electors; every district returning one hundred and twenty-four members would have one hundred and twenty-four electors; every district returning one hundred and twenty-five members would have one hundred and twenty-five electors; every district returning one hundred and twenty-six members would have one hundred and twenty-six electors; every district returning one hundred and twenty-seven members would have one hundred and twenty-seven electors; every district returning one hundred and twenty-eight members would have one hundred and twenty-eight electors; every district returning one hundred and twenty-nine members would have one hundred and twenty-nine electors; every district returning one hundred and thirty members would have one hundred and thirty electors; every district returning one hundred and thirty-one members would have one hundred and thirty-one electors; every district returning one hundred and thirty-two members would have one hundred and thirty-two electors; every district returning one hundred and thirty-three members would have one hundred and thirty-three electors; every district returning one hundred and thirty-four members would have one hundred and thirty-four electors; every district returning one hundred and thirty-five members would have one hundred and thirty-five electors; every district returning one hundred and thirty-six members would have one hundred and thirty-six electors; every district returning one hundred and thirty-seven members would have one hundred and thirty-seven electors; every district returning one hundred and thirty-eight members would have one hundred and thirty-eight electors; every district returning one hundred and thirty-nine members would have one hundred and thirty-nine electors; every district returning one hundred and forty members would have one hundred and forty electors; every district returning one hundred and forty-one members would have one hundred and forty-one electors; every district returning one hundred and forty-two members would have one hundred and forty-two electors; every district returning one hundred and forty-three members would have one hundred and forty-three electors; every district returning one hundred and forty-four members would have one hundred and forty-four electors; every district returning one hundred and forty-five members would have one hundred and forty-five electors; every district returning one hundred and forty-six members would have one hundred and forty-six electors; every district returning one hundred and forty-seven members would have one hundred and forty-seven electors; every district returning one hundred and forty-eight members would have one hundred and forty-eight electors; every district returning one hundred and forty-nine members would have one hundred and forty-nine electors; every district returning one hundred and fifty members would have one hundred and fifty electors; every district returning one hundred and fifty-one members would have one hundred and fifty-one electors; every district returning one hundred and fifty-two members would have one hundred and fifty-two electors; every district returning one hundred and fifty-three members would have one hundred and fifty-three electors; every district returning one hundred and fifty-four members would have one hundred and fifty-four electors; every district returning one hundred and fifty-five members would have one hundred and fifty-five electors; every district returning one hundred and fifty-six members would have one hundred and fifty-six electors; every district returning one hundred and fifty-seven members would have one hundred and fifty-seven electors; every district returning one hundred and fifty-eight members would have one hundred and fifty-eight electors; every district returning one hundred and fifty-nine members would have one hundred and fifty-nine electors; every district returning one hundred and sixty members would have one hundred and sixty electors; every district returning one hundred and sixty-one members would have one hundred and sixty-one electors; every district returning one hundred and sixty-two members would have one hundred and sixty-two electors; every district returning one hundred and sixty-three members would have one hundred and sixty-three electors; every district returning one hundred and sixty-four members would have one hundred and sixty-four electors; every district returning one hundred and sixty-five members would have one hundred and sixty-five electors; every district returning one hundred and sixty-six members would have one hundred and sixty-six electors; every district returning one hundred and sixty-seven members would have one hundred and sixty-seven electors; every district returning one hundred and sixty-eight members would have one hundred and sixty-eight electors; every district returning one hundred and sixty-nine members would have one hundred and sixty-nine electors; every district returning one hundred and seventy members would have one hundred and seventy electors; every district returning one hundred and seventy-one members would have one hundred and seventy-one electors; every district returning one hundred and seventy-two members would have one hundred and seventy-two electors; every district returning one hundred and seventy-three members would have one hundred and seventy-three electors; every district returning one hundred and seventy-four members would have one hundred and seventy-four electors; every district returning one hundred and seventy-five members would have one hundred and seventy-five electors; every district returning one hundred and seventy-six members would have one hundred and seventy-six electors; every district returning one hundred and seventy-seven members would have one hundred and seventy-seven electors; every district returning one hundred and seventy-eight members would have one hundred and seventy-eight electors; every district returning one hundred and seventy-nine members would have one hundred and seventy-nine electors; every district returning one hundred and eighty members would have one hundred and eighty electors; every district returning one hundred and eighty-one members would have one hundred and eighty-one electors; every district returning one hundred and eighty-two members would have one hundred and eighty-two electors; every district returning one hundred and eighty-three members would have one hundred and eighty-three electors; every district returning one hundred and eighty-four members would have one hundred and eighty-four electors; every district returning one hundred and eighty-five members would have one hundred and eighty-five electors; every district returning one hundred and eighty-six members would have one hundred and eighty-six electors; every district returning one hundred and eighty-seven members would have one hundred and eighty-seven electors; every district returning one hundred and eighty-eight members would have one hundred and eighty-eight electors; every district returning one hundred and eighty-nine members would have one hundred and eighty-nine electors; every district returning one hundred and ninety members would have one hundred and ninety electors; every district returning one hundred and ninety-one members would have one hundred and ninety-one electors; every district returning one hundred and ninety-two members would have one hundred and ninety-two electors; every district returning one hundred and ninety-three members would have one hundred and ninety-three electors; every district returning one hundred and ninety-four members would have one hundred and ninety-four electors; every district returning one hundred and ninety-five members would have one hundred and ninety-five electors; every district returning one hundred and ninety-six members would have one hundred and ninety-six electors; every district returning one hundred and ninety-seven members would have one hundred and ninety-seven electors; every district returning one hundred and ninety-eight members would have one hundred and ninety-eight electors; every district returning one hundred and ninety-nine members would have one hundred and ninety-nine electors; every district returning two hundred members would have two hundred electors; every district returning two hundred and one members would have two hundred and one electors; every district returning two hundred and two members would have two hundred and two electors; every district returning two hundred and three members would have two hundred and three electors; every district returning two hundred and four members would have two hundred and four electors; every district returning two hundred and five members would have two hundred and five electors; every district returning two hundred and six members would have two hundred and six electors; every district returning two hundred and seven members would have two hundred and seven electors; every district returning two hundred and eight members would have two hundred and eight electors; every district returning two hundred and nine members would have two hundred and nine electors; every district returning two hundred and ten members would have two hundred and ten electors; every district returning two hundred and eleven members would have two hundred and eleven electors; every district returning two hundred and twelve members would have two hundred and twelve electors; every district returning two hundred and thirteen members would have two hundred and thirteen electors; every district returning two hundred and fourteen members would have two hundred and fourteen electors; every district returning two hundred and fifteen members would have two hundred and fifteen electors; every district returning two hundred and sixteen members would have two hundred and sixteen electors; every district returning two hundred and seventeen members would have two hundred and seventeen electors; every district returning two hundred and eighteen members would have two hundred and eighteen electors; every district returning two hundred and nineteen members would have two hundred and nineteen electors; every district returning two hundred and twenty members would have two hundred and twenty electors; every district returning two hundred and twenty-one members would have two hundred and twenty-one electors; every district returning two hundred and twenty-two members would have two hundred and twenty-two electors; every district returning two hundred and twenty-three members would have two hundred and twenty-three electors; every district returning two hundred and twenty-four members would have two hundred and twenty-four electors; every district returning two hundred and twenty-five members would have two hundred and twenty-five electors; every district returning two hundred and twenty-six members would have two hundred and twenty-six electors; every district returning two hundred and twenty-seven members would have two hundred and twenty-seven electors; every district returning two hundred and twenty-eight members would have two hundred and twenty-eight electors; every district returning two hundred and twenty-nine members would have two hundred and twenty-nine electors; every district returning two hundred and thirty members would have two hundred and thirty electors; every district returning two hundred and thirty-one members would have two hundred and thirty-one electors; every district returning two hundred and thirty-two members would have two hundred and thirty-two electors; every district returning two hundred and thirty-three members would have two hundred and thirty-three electors; every district returning two hundred and thirty-four members would have two hundred and thirty-four electors; every district returning two hundred and thirty-five members would have two hundred and thirty-five electors; every district returning two hundred and thirty-six members would have two hundred and thirty-six electors; MEETING OF FORESTERS AT PARRAMATTA.

The first anniversary of the Parramatta Court of Forestry, held on Monday, the 27th instant, in the room of the Red Cow Hotel, Parramatta. The festival was held in a style that was highly creditable to the committee, and was attended by a large number of gentlemen. The programme of the day was highly creditable to the committee, and was attended by a large number of gentlemen. The programme of the day was highly creditable to the committee, and was attended by a large number of gentlemen.

The Chairman, Mr. John Williams, of the Woodstock Hotel, Parramatta, presided, and was supported on his right by Mr. George Oakes, M.L.A., and on the left, by Mr. F. O. Darvall, P.M. Mr. John Taylor officiated as Vice-Chairman. Ample justice having been done to the dinner, the most intellectual and significant part of the entertainment began.

The Chairman said that he much regretted the unfavourable state of the weather, as he had not been for that, upwards of one hundred and fifty gentlemen would, in accordance with their expressed intention, have been present on the occasion, and the festival would have been inaugurated with a formal procession from the train. However, he was glad to see that many influential persons had not been deterred by the inclemency of the weather from being present. Had the weather been favourable Parramatta would have been like Greenwich Park on a fair day.

The toast was drunk with enthusiasm, and the band playing "Rule Britannia."

Mr. Williams again called on them to charge their glasses, and said, he thought they would drink the toast for him; for their worthy Prince took an active and distinguished part in almost every useful and charitable institution in England; and though not one of their order, he was, in every respect, identified with the leading principles of their body—he was the founder of many benevolent associations, and was in the habit of visiting some of the most notorious of the gaols, in order to collect information for the purpose of ameliorating the condition of the most degraded section of the community. He would give them, "Prince Albert, and the Red Rover."

The toast was duly responded to, and the band played "British Grenadiers."

The Chairman, on rising again, said, after the loyal manner in which they drank the preceding toast, he hoped they would do so to that which he now proposed to give them, without any further comment—it was, "The Governor-General."

The toast was drunk with enthusiasm, and the band playing "Rule Britannia."

THE STORM OF MONDAY NIGHT.

The storm in Sydney on Sunday night became more stormy, and increased on Monday, raining without intermission all the day. From midnight up to daylight yesterday morning, the storm, accompanied with rain and violent gusts of wind, was more severe than we remember for many years past. Considerable damage has been done to houses, and the following are a few of the particulars:—

At Mr. Darling's Church, in the course of erection in Phillip-street, was injured by a portion of the gable falling in; the wall has only been completed a few days, and the upper part had not yet been set when the late heavy rain, blowing from the west, struck it with great violence, no less than thirteen rows of stone work, each a foot deep and of the same width, were suddenly and completely blown down. A house, nearly completed, fell from the violence of the wind; and another unfinished house, at the corner of Elizabeth-street and Market-lane, is partly blown down. In Market-street, near its junction with York-street, the roof of a house, 20 feet in length, had fallen into the street, doing some damage to the roof and front of the house in falling. In Harrington-street, the front of a two-story brick house fell completely, the roof falling in, and the house was in a tottering condition; fortunately, the roof and middle floor did not give way when they lost the support of the front wall; had they done so, the inhabitants would not have been rescued.

The Government Donkey and twenty trees, some of large growth, were torn up by the violence of the gale; and at Toxteth Park and other gardens at the Glebe great damage has been done by the blowing up of trees, shrubs, &c. At the "Inn at the South Head," had a portion of the roof blown off. Very few, however, we believe, have escaped without receiving some damage, in consequence of the fury with which the rain was driven by the wind up slates and shingles through roofs, and piercing through defective walls, doors, and windows. The particulars sustained by the shipping in the harbour, and the damage done to the wharves, are not yet known. The wind moderated during yesterday, showers fell occasionally. Up to the time of our going to press heavy gusts of wind passed over at intervals, but appearances are favourable to moderately fine weather, and a permanent change for the better is probable.

COMMERCIAL BANK.

At a general meeting of the shareholders, held at the Commercial Bank, Sydney, yesterday, Mr. T. Barker in the chair, the following report was presented, and adopted unanimously:

The Directors have the pleasure in submitting the statement of the affairs of the bank, by which it is shown that the business of the bank has been conducted in a highly creditable manner, and that the profits have been increased.

The statement of the affairs of the bank, by which it is shown that the business of the bank has been conducted in a highly creditable manner, and that the profits have been increased.

GREAT BRITISH STATE LOAN OF £750,000 DOLLARS.—This loan is guaranteed by the Government of Great Britain, and is to be repaid by the Government of New South Wales. The following capital is to be raised:—

£100,000	100 shares of £1,000 each
£50,000	50 shares of £1,000 each
£25,000	25 shares of £1,000 each
£12,500	12 1/2 shares of £1,000 each
£6,250	6 1/4 shares of £1,000 each
£3,125	3 1/8 shares of £1,000 each
£1,562 1/2	1 5/16 shares of £1,000 each
£781 1/4	7/16 shares of £1,000 each
£390 6/8	3 3/8 shares of £1,000 each
£195 3/4	1 7/8 shares of £1,000 each
£97 6/8	9/16 shares of £1,000 each
£48 15/16	4 15/16 shares of £1,000 each
£24 3/4	2 3/4 shares of £1,000 each
£12 1/8	1 1/8 shares of £1,000 each
£6 1/4	6 1/4 shares of £1,000 each
£3 1/8	3 1/8 shares of £1,000 each
£1 5/16	1 5/16 shares of £1,000 each
£7/16	7/16 shares of £1,000 each
£3/8	3/8 shares of £1,000 each
£1/4	1/4 shares of £1,000 each
£1/8	1/8 shares of £1,000 each
£1/16	1/16 shares of £1,000 each
£1/32	1/32 shares of £1,000 each
£1/64	1/64 shares of £1,000 each
£1/128	1/128 shares of £1,000 each
£1/256	1/256 shares of £1,000 each
£1/512	1/512 shares of £1,000 each
£1/1024	1/1024 shares of £1,000 each
£1/2048	1/2048 shares of £1,000 each
£1/4096	1/4096 shares of £1,000 each
£1/8192	1/8192 shares of £1,000 each
£1/16384	1/16384 shares of £1,000 each
£1/32768	1/32768 shares of £1,000 each
£1/65536	1/65536 shares of £1,000 each
£1/131072	1/131072 shares of £1,000 each
£1/262144	1/262144 shares of £1,000 each
£1/524288	1/524288 shares of £1,000 each
£1/1048576	1/1048576 shares of £1,000 each
£1/2097152	1/2097152 shares of £1,000 each
£1/4194304	1/4194304 shares of £1,000 each
